

HEALTH SERVICES/EDUCATION PHILOSOPHY

The Marlboro Central School District is committed to providing its students with comprehensive and quality health services, as well as a standards-based health curriculum. Research has shown that healthy children and youth increase their potential for academic success.

Each of our schools is staffed with a school nurse or school nurse-teacher, and we have a Nurse Practitioner at the high school level for the district. At the K-2 level there is a school nurse-teacher, in addition to two school nurses. Our intermediate school (grades 3-5) and middle school (grades 6-8) are staffed with a school nurse-teacher as well.

School Nurse-Teachers have the unique opportunity to provide health services both in and out of the classroom. Health education is essential for individuals to acquire the knowledge and skills necessary in making decisions with regards to their health, their families and community. We strive to provide our students with opportunities that will allow them to develop to their fullest potential in a healthy manner.

Please take the opportunity to view the school health services web-page for each of our buildings. For your convenience, all our district forms are posted online and may be printed, completed and returned to school as needed. We have also provided wellness-related links and a link to contact your child's individual school nurse.
